Coverage

- Multiple rooms with same room type
- Multiple rooms with different room types
- Different pax groups: adults, child with bed, child no bed, infants
- Passenger package prices reconstructed from adult, child-with-bed, child-without-bed, and infant display lines
- With-transfer/tour and without-transfer/tour scenarios
- Calculation summary total compared with quotation preview total
- Quotation save flow checked against saved local data
- Saved quotation load/edit/recalculate/save regression
- Public quotation link structure and snapshot validation

- Voucher creation/publish link regression without live Firebase writes
- Validation/error cases: missing reference, invalid dates, zero adults, insufficient room capacity
